

# LG ANARION

BREEDERS REFERENCE: LE16/340 TRIAL STATUS: NATIONAL LISTED

FULLY LOADED CLUB ROOT RESISTANT HYBRID WITH HIGH YIELD POTENTIAL AND ROBUST DISEASE RESISTANCE

FULLY LOADED HYBRID

## KEY STRENGTHS

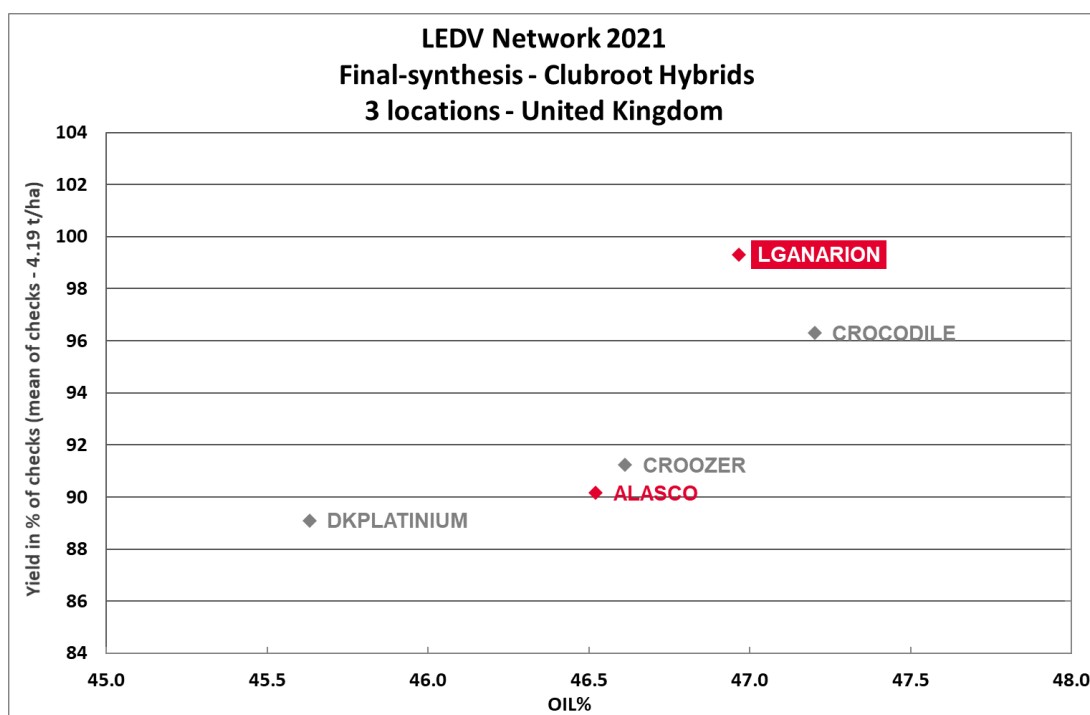

High yielding fully loaded club root variety

Short robust plant type with good standing

Robust disease resistance package with particularly good LLS resistance

Rapid autumn growth

Very good winter hardiness

Data from internal Limagrain trial, high figures indicate that a variety shows the character to a high degree (e.g. high resistance). [ ] = limited data. Agronomic features marked with \* are breeders perspective.

## AGRONOMIC PROFILE

### Agronomic Profile

Data from internal Limagrain trial, high figures indicate that a variety shows the character to a high degree (e.g. high resistance). [ ] = limited data. Agronomic features marked with \* are breeders perspective.

Resistance protects against the symptoms of TuYV: a virus transmitted by aphids which can cause up to 30% yield drop and 3% loss of oils.

Allows the crop to more efficiently utilise available nitrogen, enabling the variety to reach its genetic yield potential even in sub-optimal nitrogen situations.

Resistance helps protect against untimely seed losses around harvest caused by weather or combine passing through the crop.

Is gene-specific resistance to phoma stem canker and is included in combination with quantitative resistance in all our fully loaded hybrids.

## SOWING WINDOW

Recommended Sowing Period

Potential Sowing Period depending on seasonal conditions

**LG Anarion** was the first clubroot resistant variety to be listed in the UK which combines TuYV, Pod Shatter resistance along with RLM7 resistance to phoma. LG Anarion is nationally listed and has been through internal and independent trials in the UK for several seasons. LG Anarion has very good autumn grown and exceptional winter hardiness. Is a shorter stiffer plant type with very strong spring vigour, from internal scoring Anarion has solid resistance to both LLS and Phoma.
