

# ARETI

BREEDERS REFERENCE: LE17/344 TRIAL STATUS: NATIONAL LISTED

FULLY LOADED HYBRID WITH HIGH YIELD POTENTIAL & EXCEPTIONAL WINTER HARDINESS, PERFECTLY SUITED TO THE EARLIER DRILLING WINDOW.

FULLY LOADED HYBRID

## KEY STRENGTHS

Very good spring vigour

Shorter, compact plant type

Fully loaded hybrid with RLM7, POSH & TuYV

Excellent resistance to Phoma & Stem Canker

Testing shows consistently high performance in E/W region

## AGRONOMIC PROFILE

Data from internal Limagrains trial, high figures indicate that a variety shows the character to a high degree (e.g. high resistance). [ ] = limited data. Agronomic features marked with \* are breeders perspective.

Resistance protects against the symptoms of TuYV: a virus transmitted by aphids which can cause up to 30% yield drop and 3% loss of oils.

Is gene-specific resistance to phoma stem canker and is included in combination with quantitative resistance in all our fully loaded hybrids.

Resistance helps protect against untimely seed losses around harvest caused by weather or combine passing through the crop.

## SOWING WINDOW

Recommended Sowing Period

Potential Sowing Period depending on seasonal conditions

LG Areti is a short robust hybrid variety, with a strong disease resistance profile. It combines all of Limagrains fully loaded traits including RLM7, TuYV and Pod Shatter Resistance. With good establishment and exceptional spring vigour, LG Areti fits the early sowing window for hybrids.
