All data is from the AHDB Candidate wheat trials harvest 2022 database. See <https://ahdb.org.uk/rl> for full dataset. On the 1-9 scales, high figures indicate that the variety shows the character to a high degree. (e.g. high resistance). () = limited data. Agronomic features marked with * are breeders perspective. T = Data from trials treated with fungicide and plant growth regulator. UT = Data from untreated trials
