### Excellent animal performance

Achieved by using late Perennial Ryegrasses, Clover and Timothy. This blend of species will improve palatability in dry weather and in mid-summer, ensuring maximum intake of high quality grass and optimising animal production.

### Very high quality

Red Circle's blend of late heading Perennial Ryegrasses, Clover and Timothy provide high D-value combined with high levels of sugar, minerals and protein content.

### Red Circle is available in a number of variations:

- **Red Rotation**  
(without clover)
- **Northern Red**  
(without Timothy)
- **Organic Red**  
- Available with organically produced constituents
